SKILLS

- C# | .NET | Java | JavaScript | Python | Solidity | C | MSSQL | Node | Express | React | jQuery | Git
- XUnit | Jest | Unit Testing | OOP | Hardhat | Unity 2D | Game Development
- Microservices | Distributed Systems | Frontend | Backend | Full-Stack | Japanese (N3JLPT), English Vietnamese.

ABOUT ME

I'm a software developer with hands-on experience in building web applications, APIs, and testing. I aim to become a Bridge Engineer in Japan, where I can combine my technical background with communication skills to connect teams and clients. I'm looking for opportunities in a global, fast-paced environment to grow further and contribute real value.

EXPERIENCE

Java Software Developer VTI · Permanent Staff Ha Noi, Viet Nam 2024/07 - 2025/08

- Worked on multiple projects involving GoLang, Java Web Applications, and Java API development. Responsible for testing tasks including test case creation, executing Unit Tests (UT) and System Tests (ST). Took lead roles managing 1–2 team members, conducting code reviews, test case reviews, and EVD (Evidence Document) reviews.
- Collaborated directly with clients, including notable enterprises such as EDION and HITACHI.
- Skills: GoLang · Java · Spring Boot · Java Web · REST API · JUnit · System Testing · Test Case Design · Code Review · Firebase · MySQL · Git · Jira

Java Software Developer VIAN Solutions · Contract Ha Noi, Viet Nam 2024/05 - 2024/08

- Developed a health tracking and appointment scheduling app for chronic disease patients in Korea, resulting in 5,000 users and over 100,000 health metrics tracked in three months. Enhanced medication adherence by 30% and facilitated over 2,000 virtual appointments.
- Skills: Java · JavaScript · Core Java · Spring Boot · Spring Security · React Native · React.js · Spring Framework · Amazon Web Services (AWS) · MySQL · Firebase · Android Studio

Research Assistant KIS Vietnam Creative · Internship Ha Noi, Viet Nam 2023/04 - 2023/08

- Spearheaded the development of a scheduling system for faculty and students using reinforcement learning, increasing scheduling efficiency by 40%.
- Designed and implemented algorithms for optimal resource allocation, reducing conflicts by 25%.
- Conducted comprehensive testing and validation to ensure system reliability and performance.
- Skills: Python (Programming Language) · Machine Learning · Reinforcement Learning · Java · Colab · GitHub · Translation · Software Design · Software Construction · Project Management · Business Analysis

EDUCATION

Bachelor of Software Engineering FPT University Ha Noi, Viet Nam 2020/11 - 2024/08

- Major in Software Engineering

CERTIFICATIONS

- Certificate of Japanese Language Proficiency N2(2025/08)

PROJECTS

Ha Noi, Viet Nam 2024/05 - 2024/08

SMASH Health SMASH Health is a comprehensive health tracking app designed to help users manage and improve their overall well-being. Our app allows users to monitor various health metrics such as heart rate, blood pressure, physical activity, and sleep patterns. With easy-to-use features, SMASH Health enables users to log their daily health data, set personal health goals, and receive customized insights and reminders. Whether you're managing a chronic condition or simply striving for a healthier lifestyle, SMASH Health is your trusted partner in achieving and maintaining optimal health

Skills: Core Java · Java · React Native · React.js · MySQL · HTML · Git · Spring Boot · Spring Data · Spring Security

Ha Noi, Viet Nam 2023/09 - 2023/12

SkyBlasters This project is a 2D plane shooting game developed on the Unity platform. The goal was to create an action-packed and exciting arcade game where players would control fighter planes to fight enemies and complete missions.

Skills: Unity · C# · Aseprite · Audacity

SmartTeaching Planner

Ha Noi, Viet Nam 2023/04 - 2023/08

This project aims to automate the process of scheduling teaching assignments for teachers using Reinforcement Learning algorithms. The goal is to optimize schedules, minimize conflicts, and enhance the efficiency of both teachers and students.

Skills: Machine Learning · Python (Programming Language) · Reinforcement Learning · TensorFlow · PyTorch · Keras · Open AI

EtherContract

Ha Noi, Viet Nam 2023/01 - 2023/03

This project focuses on developing and deploying smart contracts on the Ethereum platform using the Hardhat framework. The goal is to create a powerful and flexible solution for building, testing, and deploying smart contracts.

Skills: Hardhat · Solidity · Ethereum · Ganache · web3.js · Ethers.js · Truffle Framework

eShield Insurance

Ha Noi, Viet Nam 2022/08 - 2022/10

eShield Insurance delivers seamless, digital-first insurance solutions, offering a wide range of coverage options tailored to your needs. Our platform ensures quick, reliable, and user-friendly access to insurance products, providing peace of mind with just a few clicks.

Skills: Java · JavaScript · Socket.io · Spring Boot · Spring Security · Microsoft SQL Server · HTML · Design Patterns
